LOGI PACK

PRECISE SHEET-ADDING SYSTEM

MÜLLER LOGIPACK
PRECISE SHEET-ADDING SYSTEM

Stability and precision are characteristic for the Müller LogiPack. Sheet-adding systems such as these are almost indispensable in intralogistics nowadays. Order picking and distribution centers rely on them when it comes to the targeted addition of invoices or personalized documents in shipping cartons – around-the-clock.
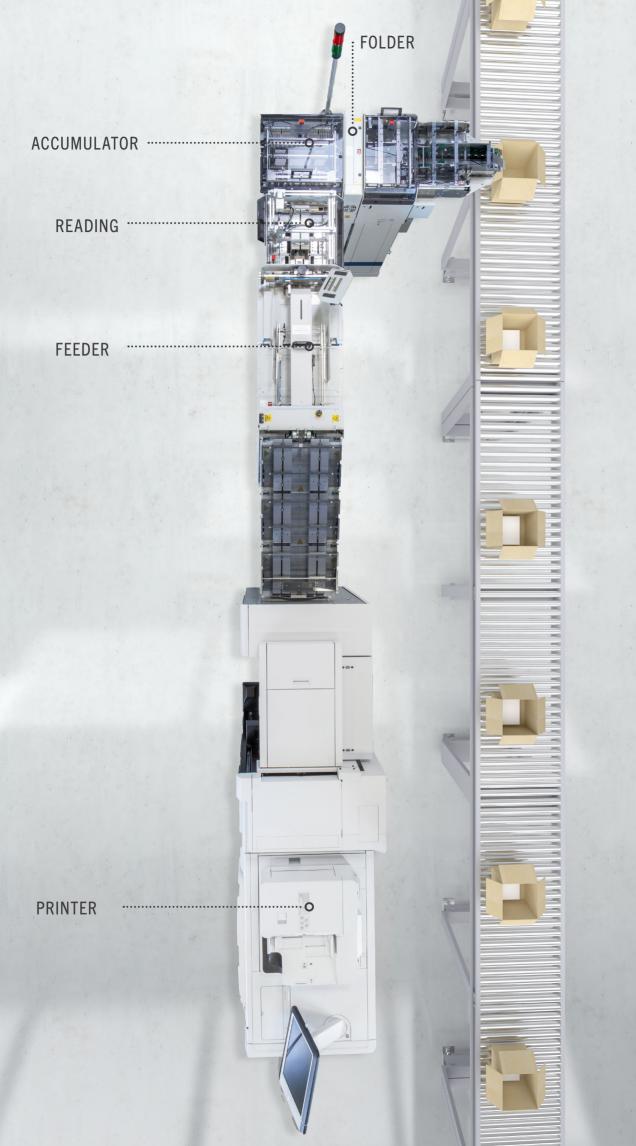

Before a carton reaches the LogiPack, its carton ID has already been recorded. The variable data is produced just in time by the integrated digital printer. Further processing steps such as collecting, folding or stitching are carried out immediately so that the document set is ready for dispatch. When the carton arrives at the LogiPack, it supplies the documents in a targeted manner. Depending on customer requirements up to 2,200 times per hour. Multi-integrated code matching between document, carton and carton content checks the match. Errors are thus excluded.

Like all of Müller's systems, the LogiPack is flexibly configurable and can be easily integrated and expanded into existing conveyor systems. Automatic document entry is secure in processing, available at all times and has a high throughput rate.

High processing reliability
High availability
High throughput capacity

TECHNICAL DATA

THROUGHPUT	UP TO 2,200 CARTONS/H WITH 2 SHEETS
	UP TO 16 SHEETS WITH SINGLE FOLD INSERTION OF GROUPS OF ANY SIZE
DOCUMENT	CUT SHEET AND CONTINUOUS
	ALL STANDARD FORMATS
	LANDSCAPE AND PORTRAIT
	ALL GRAMMAGES
PERFORMANCE PRINTER	SUITABLE FOR THE DOCUMENT THROUGHPUT
MOUNTING DIRECTION	PARALLEL OR 90° TO CONVEYOR SYSTEM
SYSTEM HEIGHT	700 – 1,500 MM
CARTON HEIGHT	VARIABLE
INTERFACE	INTERFACE TO CONVEYOR SYSTEM ADJUSTABLE
OPTIONS	READING (ALL COMMON CODES)
	FOLDING (UP TO 8 SHEETS AT 80 GSM)
	STITCHING
	ACCUMULATING
	BUFFER STATION (CASCADE FUNCTION)
	AUTOMATICALLY ADJUSTABLE INSERTION HEIGHT

FLEXIBLE PAPER MANAGEMENT SOLUTIONS

Müller stands for the most flexible paper handling solutions for the automated processing of digital print products. From cutting, folding, inserting to the verification of documents up to the affixing of plastic cards: Systems from Müller offer state of the art technology and high reliability for the most diverse requirements from transaction printing up to graphic arts applications.

Müller follows a unique principle: To meet individual customer requirements, the tailor made paper management system can be configured out of more than 100 combinable modules. The modules are not only combinable with each other, but also easily match with existing systems. To implement new customer applications, the modules can be easily reconfigured. The Müller module concept also automates application, which had to be processed manually in the past.

From the mechanics to electronics and the software Müller produces and develops almost all of the components on its own with the highest German quality standards. This not only speeds up the development of the systems. It also guarantees the long-term availability of spare parts and at any time customer specific solutions can be realized.

Müller.
Flexible. Intelligent. Efficient.
