UNIVERSAL MAIL TRACKING SYSTEM

MÜLLER 7700
UNIVERSAL MAIL TRACKING SYSTEM

With the Müller 7700 output reading system, tracking and tracing is simple. The system is modular designed and can be easily used online or offline. Thanks to flexible height adjustability and universal interface, integration into inserting systems is quickly regardless of the manufacturer.

The universal mail tracking system monitors envelopes for highest quality standards and maximum security — up to 30,000 times per hour. Depending on customer's definition it reliably diverts unreadable documents, duplicates and sequence errors, for example.
Tracking is possible for various formats — from C6/5 to C4. Thanks to full-page reading, the effort involved in job adjustment is minimal, user-friendly and thus ensures short changeover times.

Configuration flexibility • height adjustability, suitable for all manufacturers
Dynamic speed • automatic adaptation to the inserting system
Envelope flexibility • all envelope sizes
Ease-of-Use • central display, short set-up times

FLEXIBLE CONNECTION

The Müller 7700 consists of reading and deflection modules and can be integrated into all kinds of upstream and downstream systems. Its great advantage is the simple height adjustability, which can be controlled by the operator. This means that it can be connected to inserting systems and envelope stackers of all manufacturers and the paper run height can be adjusted in no time.

No matter which formats are to be processed — the Müller 7700 manages them: the system covers all common envelope sizes.

For physical handling, the mail tracking system is rollable, thus mobile and easy to handle.

PERFORMANCE	UP TO 30,000 ENVELOPES / H
ENVELOPES	C6/5 UP TO C4*
PROCESSING	POSITION ENVELOPE WINDOW IS FLEXIBLE THANKS TO FULL PAGE READING
	UP TO 13 MM ENVELOPE FILLING STRENGTH
	LANDSCAPE, PORTRAIT
	FACE UP, FACE DOWN
INTERFACE	UNIVERSAL INTERFACE TO ALL INSERTING SYSTEMS
DOWNSTREAM PERIPHERY	COMPATIBLE WITH DELIVERY BELTS, VERTICAL STACKERS AND MAILBOX SYSTEMS FROM ANY MANUFACTURER

* Special dimensions are optionally available on request.

FLEXIBLE PAPER MANAGEMENT SOLUTIONS

Müller stands for extremely flexible paper management solutions for the automated processing of digital print products. From cutting, folding and inserting through to the verification of documents and the affixing of plastic cards: Systems from Müller feature the latest technology and a high level of reliability for a wide range of different requirements from transaction printing through to graphic arts applications.

Müller works according to a unique principle: paper management systems are configured from more than 100 combinable modules to meet individual customer requirements. The modules cannot only be combined with one another but can also be integrated into existing systems. Whenever there is a new customer application to be realised, the modules can be quickly and easily combined to form a new configuration. The Müller module concept also automates applications that could previously only be processed manually.

From the mechanics and electronics through to the software, Müller produces almost every component itself to the highest German quality standard. This not only speeds up the development of the systems while guaranteeing the long-term availability of spare parts but also allows customer-specific adaptations to be carried out at any time.

Müller.
Flexible. Intelligent. Efficient.
